

Animals incl Humans

Year 3/4

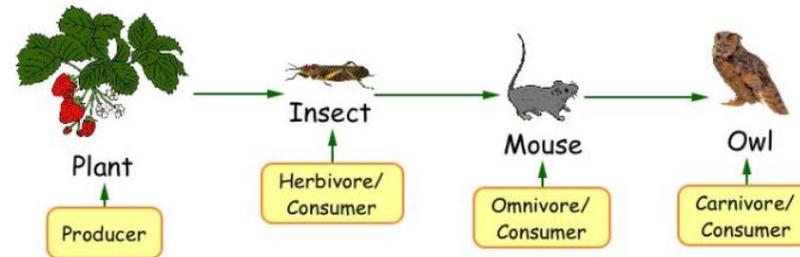

Human Teeth and Their Functions

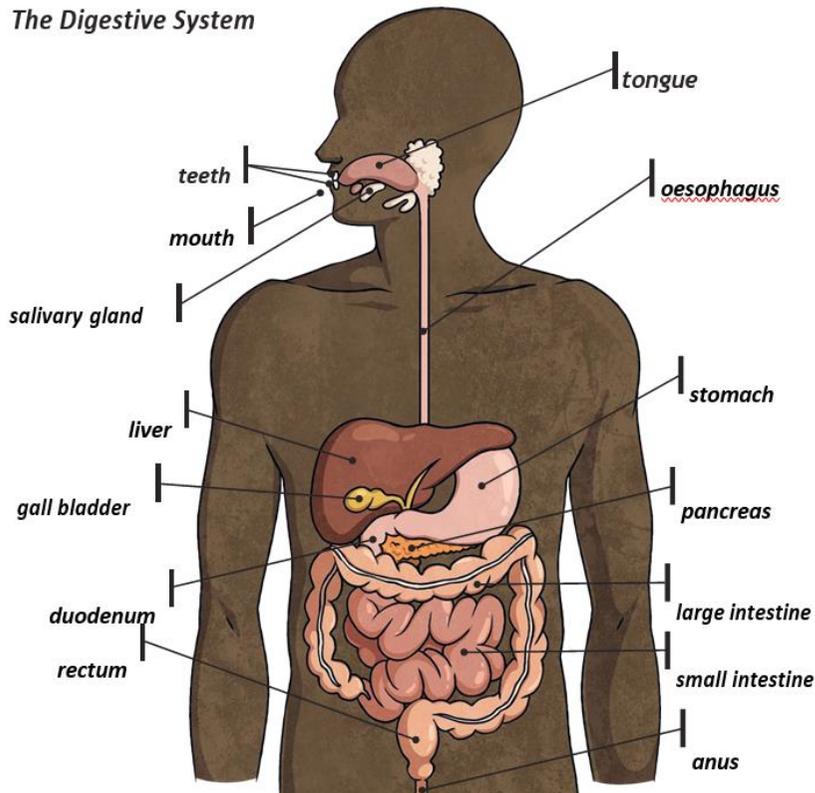

Some people have wisdom teeth but they have no function now.

The food chain of an owl

The food chain shows the path of energy from one living thing to another.

The Digestive System

Key Vocabulary

- Digest** - To break down food so it can be used by the body.
- Oesophagus** - A muscular tube which moves food from the mouth to the stomach.
- Stomach** - An organ in the digestive system where food is broken down with stomach acid and by being churned around.
- Small intestine** - Part of the intestine where nutrients are absorbed into the body.
- Large intestine** - Part of the intestine where water is absorbed from remaining waste food. Faeces are formed in the large intestine.
- Rectum** - Part of the digestive system where faeces are stored before leaving the body through the anus.
- Herbivore** - An animal that eats plants.
- Carnivore** - An animal that feeds on other animals.
- Omnivore** - An animal that eats plants and animals.
- Producer** - An organism, such as a plant, that produces its own food.
- Predator** - An animal that hunts and eats other animals.
- Prey** - An animal that gets hunted and eaten by another animal.
