Physical Features of a seaside

A seaside resort has many physical features. **Features** such as the beach, the sea, cliffs and caves have been made naturally. This means they were made by nature.

Human Features of a seaside

Human features found at the seaside include the pier, the promenade, a lighthouse and fair-ground. These are all man-made.

Seasonal Changes

There are changes in weather in each season. In spring it is often rainy and the temperature begins to get warmer.

In summer, the sun is much stronger. The temperature is warmer than any other season.

In autumn, the weather turns chillier, windier and there is often rain.

In winter, it is often cold and frosty. It has to be freezing to snow.

How the Weather affects us

The weather affects what we do and what we wear. If it is rainy, we wear waterproof clothes when we go outside.

At the seaside, we need to wear sun cream and sun hats.
